

CORALIFE®

CIRCULATION PUMP

AVAILABLE IN THREE SIZES

New Coralife Circulation Pumps simulate natural reef and river currents by continuously circulating the water in your aquarium. Three sizes with lab certified flow rates make it easy to find the perfect amount of current for any application.

The super strength suction cup and quick release mounting bracket makes installation, removal and repositioning a snap.

A pivot bracket allows for maximum flexibility in positioning the pump to accurately flow in the targeted area.

The return nozzle and turbo prop impeller increase water velocity while distributing water flow over a wide area.

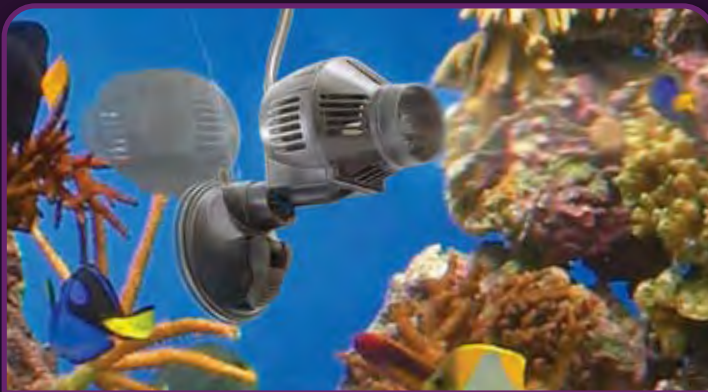

AVAILABLE IN
THREE SIZES

750

1300

2900

GALLONS PER HOUR

Simulate natural reef and river currents for a vibrant, active aquatic environment

PRODUCT FEATURES
